## EXPERIENCE

### Full Stack Web Developer

Larry Birdle

January 2021 to April 2021

- Created entire functionality and basic design in 4 hours
- Averaged 30,000+ unique visitors per day in first week after launch, generating \$25 per day in ad revenue
- Started GoFundMe fundraiser to pay for site hosting fees, raising 186% of initial goal within 24 hours

### iOS Developer

spllit iOS app

May 2021 to Present

- Designed and developed entire iOS app using SwiftUI and Firebase
- 20+ downloads across 4 regions in the first 30 days
- Over 20 updates so far, still actively adding new fixes and features
- Source code available on [GitHub](#)
- Available for download on the [App Store](#)

### Front End Web Developer

Alexander Academy

July 2021 to January 2022

- Used Webflow to host site and for simple web pages
- Created custom HTML/CSS/JS components from ideas and pictures
- Integrated complex JS sorting system with custom dropdown menus
- Worked with multiple developers with skills in responsive design
- Kept on for future company projects due to the quality and standard of my work
